1 Introduction

This document contains information about the different course units that i am currently taking this semester. and some things i like about them. (or not).

2 COMP10120

This is the first year group project we will be learning to work as a group to produce a web application.

2.1 Things i like

1. Latex
2. Pi
3. Independent research

2.2 Things i don't like

1. Research
2. Online tests
3. Presenting

3 COMP11120

This course is about the mathematics behind computing.

3.1 Things i like

1. Set theory
2. Language
3. Expressions

3.2 Things i don't like

1. Questions
2. Assessments
3. Lectures in a church

4 COMP12111

This course is about the components and logic behind the computer hardware

4.1 Things i like

1. Practical work
2. Logic puzzles
3. Cadence!

4.2 Things i don't like

1. Getting confused with the wires
2. When Cadence breaks
3. Cold room

5 COMP15111

This is the Computer Architecture course, it teaches us about the fundamental programming techniques

5.1 Things i like

1. Learning assembly code
2. Optimising loops
3. Finding bugs with the simulator

5.2 Things i don't like

1. Bugs
2. When the microphone doesn't work
3. the many many different ARM codes

6 COMP16121

The first year java lectures by John Latham

6.1 Things i like

1. Haywain Shirts!
2. Learning Java ... Properly
3. Coffee Time

6.2 Things i don't like

1. Most of the lessons i know already
2. No Clicker time :(
3. not long enough
